

DIAMANTFLEX® PROTECTIVE COVER

Light, compact and cost-efficient

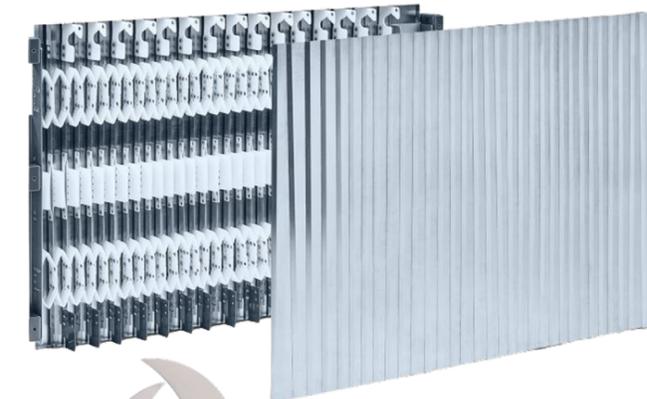

Dynamic. Different. Dedicated.

DIAMANTFLEX® PROTECTIVE COVER

HIGHLIGHTS

-  Compact Design (Block size per lamella <math>< 2,6 \text{ mm}</math>)
-  Ideal for accelerations up to 2g
-  Optimum protection for high metal removal rates
-  Lightweight construction
-  Cost efficient design
-  Suitable for traversing speeds up to 150 m/min

Source: MM Maschinenmarkt

DIAMANTFLEX® was awarded the MM award by MaschinenMarkt in 2022 in the category components, assemblies, accessories.

PRODUCT DESCRIPTION

The product innovation DIAMANTFLEX® is a very compact, durable protective cover whose lightweight, new design contributes to a weight saving over 30 percent. Thus DIAMANTFLEX® facilitates the construction of more compact machine tools and therefore leads directly to significant cost savings.

DIAMANTFLEX® is ideal for high dynamic applications due to its design and moreover less expensive than cover systems currently available on the market.

Light, more compact, more cost-efficient – convince yourself of DIAMANTFLEX® – **Made by MöllerWerke**
