

Information regarding the Dodd-Frank Wall Street Reform and Consumer Protection Act 2010 section 1502 “Conflict minerals” (US) and und EU regulation 2017/821

The EU regulation 2017/821 addresses importer of conflict minerals, conflict mineral yielding ore or semi-finished products made by conflict minerals. MöllerWerke GmbH as a downstream user is not liable to this regulation.

With due regard to the reporting obligations which have been established under the Dodd-Frank Wall Street Reform and Consumer Protection Act 2010 section 1502 “Conflict minerals”, we would like to inform you that we have in all conscience checked our materials. We have started to screen the main materials and semi-finished products, if they contain one or more of the metals gold, tin, tantalum, and tungsten as a well-directed substance. We have detected several components of the articles we supply, which may contain these metals as well-directed substance: thermoplastic components, elastomer, Molerit[®], bearings, fittings, etc. Generally we cannot rule out the fact that these conflict minerals might be present as trace elements in further parts.

Rubber Bellows, Rubber Hoses, Rubber Disk-Bellows, Disk-Bellows, Compensators, Slideway Covers

Thermoplastic components, elastomers, bearings, fittings may contain one or more of the above-named metals as substance.

Molerit[®]-Articles

Molerit[®] may contain one of the above-named metals as substance. We have asked our suppliers of the mentioned materials and on the basis of their answers we have determined to the best of our knowledge and belief that their minerals do not originate from the Democratic Republic of Congo or adjoining regions, as defined in the Dodd-Frank Act and that their minerals are declared to be “DRC Conflict Free” as defined by the Dodd-Frank Act.
